STUDENT DELIVERABLE

RISK & CAPITAL ANALYSIS	
PARTICULARS	OBSERVATION
AVAILABLE CAPITAL BEFORE THE TRADE	1,00,106.64
TRADE VALUE / CAPITAL COMMITTED	1,00,000 (Appro.)
TRADE OUTCOME	Loss
REALISED PROFIT / LOSS	+100.96
CAPITAL REMAINING AFTER THE TRADE	1,00,100.96
EFFECT OF THE TRADE ON AVAILABLE CAPITAL	5.68
WAS A SIGNIFICANT PORTION OF AVAILABLE CAPITAL COMMITTED TO THE TRADE?	No — the visible individual BTC orders are far below total capital.
CAPITAL MANAGEMENT OBSERVATION	The position sizes were small relative to the account balance, limiting risk and preserving most available capital.
KEY LEARNING FROM CAPITAL ANALYSIS	Position sizing matters: committing a small portion of capital can control downside risk while still allowing profitable trades.
